Highlights Software Development

- Developed numerous successful software solutions including web apps, ETL /distribution systems, services, and databases.
- Successfully transitioned a team relying on legacy development frameworks/techniques to a modern development stack.
- Fixed critical performance, reliability, and security issues on failed third-party apps.

Project Management/Systems Analysis

- Acted as lead on numerous successful software projects.
- Acted as Systems Analyst during the planning, analysis, and design phases of various projects.
- Successfully took over an over budget/overdue third-party development project and put the project on a path to success.

Career

- Received a 5 year promotion in only 2 years based on merit and contribution to my team and organization.
