SUMMARY

A skilled and motivated Software Developer with strong skillsets in .NET, C#, JavaScript, SQL, and HTML/CSS. 3+ years of experience developing client focused software, with an emphasis on security, reliability, and performance. Comfortable and experienced with front-end and back-end development tools and techniques.

SKILLS

- Object-oriented development
- Common architectures including MVC, MVVM, n-tier, and client-server
- Design patterns including Gang of Four and domain specific (ex. Dependency Injection, Unit of Work/Repository, etc.)
- Asynchronous and multi-threaded programming techniques
- Knowledge of data structures and algorithms
- Dependency mocking and unit testing code
- Managing development lifecycle using Visual Studio Online

- C#, JavaScript, SQL, PowerShell, HTML/CSS
- ASP.NET (MVC, Web API, Web Forms), Unity, Moq
- SQL Server, Entity Framework, ADO.NET
- REST, JSON, XML, AJAX
- jQuery, AngularJS, KnockoutJS, Bootstrap, Kendo UI
- Visual Studio, SQL Server Mngt. Studio and Profiler, Version Control (TFS, Git), Visual Studio Online, PowerShell ISE

EXPERIENCE

Beaverton School District | Beaverton, OR

Developer *June 2014 – Present*
- Develop web applications using ASP.NET MVC and various JavaScript frameworks such as KnockoutJS and AngularJS.
- Utilize Bootstrap to develop mobile-first web applications.
- Secure applications with Windows and Forms authentication.
- Maintain source code in TFS and Visual Studio Online.
- Design and develop SQL Server databases.
- Lead development projects, often through the entire development lifecycle.
- Communicate with stakeholders about tickets and enhancements.
- Debug code locally and remotely using Visual Studio and Firefox/Chrome developer tools.
- Create ETL and integration scripts with PowerShell.
- Configure IIS and manage application deployments and builds.

EDUCATION

Oregon Institute of Technology

June 2014 Bachelor of Science in Information Technology (application development)
